

Devexa AI Trading Assistant

USING AI TO EMPOWER YOUR TRADERS

FEATURES FOR BROKERS

- A broadcast channel with push notifications
- Integration with CRM
- Traders behaviour and interests analytics
- Support of multiple locales

FEATURES FOR TRADERS

- Voice typing and control of actions
- Natural language support
- Real-time account access
- Instant answers to help desk queries

Devexa AI trading assistant breaks new ground among intelligent personal assistants for traders. It uses conversational UI to interact with traders and an AI to understand the context of the query. Traders are free to use natural language to trade the markets while keeping up to date on real-time quotes, charts and fundamentals, their portfolio, orders and positions from anywhere at anytime.

BROKERS AND THEIR AFFILIATES BENEFIT FROM:

- A new communication and marketing channel
- Capability to learn traders behaviour and analyze their interests
- Marketing automation via personalized offers
- Increased conversion rate and customer retention
- Improved customer satisfaction rates through increased customer support capacity

Devexa AI trading assistant is a platform agnostic solution that can be customized and integrated directly into a brokers infrastructure. It supports different messengers and smart speakers, news sources, and AI technologies according to the broker's demands.

BROKER'S CHALLENGES ADDRESSED

- Onboarding traders
- Facilitation for aspiring traders
- Accessible for customers with special needs, i.e. in case of visual impairments

TRADING PLATFORMS SUPPORTED:
